

Supplementary Material: URCDM: Ultra-Resolution Image Synthesis in Histopathology

A Appendix

Fig. 1: Samples of an ultra-resolution Whole Slide Image (WSI)s generated using a Ultra-Resolution Cascaded Diffusion Models (URCDM). Full-scale ultra-resolution image ($41\,344 \times 41\,344$ pixels), and highly zoomed-in crops of that image (1024×1024 pixels) compared against random real and baseline images.
